

HAWAII CLEAN POWER ALLIANCE

HCPA is your voice in Hawaii, pushing out information on the current state of utility-scale renewable energy initiatives in Hawaii and staying on top of news, opportunities, regulatory dockets, policies, and legislative activity. We are a non-profit corporation organized to advance the development and sustainability of clean energy in Hawaii. HCPA educates the public about the benefits of clean energy and advocates for the advancement of utility-scale, grid-connected clean energy projects

Champion accelerated opportunities for Independent Power Producers (IPPs) in Hawaii

Network with IPPs as well as environmental, permitting, tax, legal, regulatory, legislative, and engineering, procurement, and construction (EPC) experts

Construct a dialogue that demonstrates the value of competition for ratepayers. It propels Hawaii's environment and the future of our island communities

One Voice under the umbrella of a united organization, delivering a strong message of competition, fairness, issues and solutions, and an environment conducive to renewable energy development in Hawaii

Access Stakeholders and Communities

Identify issues and concerns and advocate for solutions

Our Goals, Our Commitment, Our Plans

VISION

Our vision is clear: utility-scale, grid-connected clean energy projects benefit our island communities, create rate relief for ratepayers most in-need, and put Hawaii on the path to 100% renewable energy and a self-reliant tomorrow. We believe in the power of the future

ADVOCATE

We testify. We file responses. We meet with decision-makers. We are in the room every day, making sure our members' voices are heard and their interests are protected

VOICE

Our collective voice informs, educates, advocates, and promotes the promise of the power our members produce. We are a trusted voice within the legislative, regulatory, media, and public channels, and we make it our mission to share science-based facts, proven results, and industry data so that our commitment is heard and understood

PARTNER

We know that a future built upon clean energy requires partnerships — with communities, with other providers, and with our neighbors. Our members do that every day, and as an association, we foster those relationships, promote their values, and tell the stories that come from our work together

EDUCATE

Industry technology and benefits change rapidly. What's possible today and what's still to come must be shared with thought leaders, community members, partners, and allies. We make it our job to share that knowledge, to educate our communities on utility-scale, grid-connected clean power
